

DAY CAB CONNECTED™
Complete Vehicle Uptime Solution

Idle Smart is an automated engine start stop solution that maintains vehicle uptime by keeping batteries charged and engines warm. Weighing less than 4 lbs, Idle Smart automatically engages and resets itself and therefore never requires driver input.

BATTERY PROTECTION

Battery Protect™ allows fleets to monitor batteries and run the engine for a desired amount of time when voltages get low. Fleet managers can simply use Idle Smart's remote management capabilities to program a voltage threshold and run time. Fleets have the flexibility to set parameters based on battery type, condition and hauling operations. The key does not have to be in the ignition to enable Battery Protect and access is password protected at all times.

Battery Voltage Range:

11.2v to 12.7v

Recharge Run Time Range:

10 to 60 minutes

COLD START GUARD

With Cold Start Guard™, fleets have the ability to have their trucks start at a specific coolant temperature and run until the desired engine coolant temperature is reached. Fleet managers can simply use Idle Smart's remote management capabilities to program a starting temperature, ideal coolant temperature, and restart interval.

Engine runs until desired coolant temperature is reached

Engine Coolant Range:

50° to 180°

Automatic Monitoring Intervals:

1 to 24 hours

OPERATIONAL ALERTS

Idle Smart has been designed to work automatically in the background and has the ability to reset itself so that it is always running. If needed, fault codes and operational errors are immediately sent to fleet managers to alert them of active performance issues. This information can be automatically sent to the appropriate team members by email or text and allows fleet managers to focus on day-to-day operations by only alerting them to active alerts or issues that need attention.

Delivery Notification Options:

Email

Text Messages

REMOTE MANAGEMENT

Desktop Control

Allows unlimited access to complete control of Idle Smart's features and parameters from any location.

Fleet Management

From 100 trucks to 10,000 trucks, manage and automatically update an entire fleet's parameters from one easy-to-use screen.

Truck-Specific Settings

Flexibility to change parameters for individual trucks based on preference, season, or geography.

PERFORMANCE REPORTING

Operational Metrics

Easy-to-understand performance metrics allow for quick and easy understanding of fleet performance.

Actionable Diagnostics

Determine the number of times and root cause for truck starts to identify weak batteries or efficiency opportunities.

Identify Areas for Improvement

Quickly identify and address fleet weak points and compare performance between two or more trucks.

INTELLIGENT SOFTWARE

Regeneration Alerts

Idle Smart has been designed to account for regens and will automatically disable itself and notify the appropriate person if a regen is needed. Idle Smart will reset itself when complete.

Overcrank Protection

Idle Smart has been developed with intelligent software to protect starters by limiting crank intervals and by disabling itself in situations with consecutive unsuccessful starts.

Over-the-Air Updates

Idle Smart provides free over-the-air software updates automatically so the system will always have the most up-to-date software available.

LIFETIME PRODUCT WARRANTY

Our commitment to reliability and performance is unmatched in the industry. We stand behind our product and its performance for the life of its use. If your Idle Smart solution stops working for any reason, simply let us know and we will provide to you another system within 24 hours of when you contact us and at no cost to you.

24/7 CUSTOMER SUPPORT

We understand that fleets run 24 hours a day, 7 days a week. As a result, we're committed to being available 24 hours a day, 7 days a week. Have an issue or question? Call us, we'll answer.

MAINTENANCE FREE

Idle Smart has been designed to be maintenance free for the life of its use. No service intervals or scheduled downtime. Just reliable and predictable performance.
